Chemical Engineering and Construction Site Services

Project Description

Since the restart of this refinery in 2002, CH2M HILL Lockwood Greene has been the on-site engineering and construction management contractor for the refinery. With an on-site staff of 20 people supplemented by our San Juan office of over 150 professionals, we have been able to meet the operational needs and support the capital plans of the refinery by performing the engineering and construction associated with a new truck loading rack as well as a SCOT Tail Gas Treater and Claus Sulfur Recovery Unit modifications.
