Solar/PV

Maximizing the Return on Your Assets

From economical building shells to major manufacturing complexes, CH2M HILL focuses on helping solar PV clients maximize the return on their assets. Our collaborative process recognizes each client's unique needs and expectations, and identifies innovative solutions that deliver extraordinary value. Our integrated project delivery is structured to meet aggressive market-driven schedules, anywhere in the world.

Meeting the Challenges of a Market in Transformation

We tailor solar PV solutions to meet the demanding requirements of a dynamic and fast-changing market.

Meeting Demand – With deep resources and a broad range of services, we can mobilize a team to rapidly build facilities. We support the need for speed-to-market to gain market share.

Raising the Bar on Cost/W – Our innovative approach to manufacturing integration improves efficiencies through the manufacturing line and reduces the cost of support buildings.

Environmental Stewardship – As a world leader in environmental engineering, CH2M HILL offers comprehensive expertise in environment protection, sustainability, cleanup, and reuse.

Evolving Technologies – For 20 years, CH2M HILL has helped high technology clients scale up, commercialize, rapidly deploy, and maintain their competitive advantage as leaders in evolving technology.

Energy Solutions – In the past decade, the pace of reform and change in the electricity sector has rapidly increased. CH2M HILL offers expertise in power generation, renewable energies, solar farms, oil and gas, and energy services and operations.

Advanced Services – CH2M HILL offers specialized resources and capabilities including Industrial Engineering, Front End Planning, Manufacturing Integration, Facilities Management, and Operations.
