

Architecture & Planning

Client

University of Nebraska

Location

Lincoln, Nebraska, USA

Nebraska Center for Virology

Project Description

This project is recognized as a Center of Biomedical Research Excellence and combines the expertise and facilities of Nebraska's leading biomedical research institutions: the University of Nebraska-Lincoln, the University of Nebraska Medical Center, and Creighton University. IDC Architects, an affiliate of CH2M HILL, is collaborating with Health, Education, and Research Associates.

IDC Architects' design efforts included interactive 3D modeling and hand sketching, as well as brainstorming and rapid prototyping. Using these techniques allowed the facility to be designed in two work sessions over four weeks time, and obtained full consensus from stakeholders and outside technical viewers.

Building Statistics:

- Square footage: 60,000
- Completion: 2006 (Estimated)
