Our Presence in Argentina

CH2M HILL is a global leader in full-service engineering, planning, consulting, construction, and operations. We have worked with local and international clients throughout South America for approximately 30 years.

Our Buenos Aires, Argentina, location was established in 1980 as an engineering and construction office for local and international clients.

With approximately 500 experienced professionals, our local offices of Buenos Aires, Bahía Blanca, Campana and Río Grande and staff are backed by a USD 6.4 billion company serving clients worldwide with over 25,000 employees in 80 countries. We use technology transfer and project development capabilities—as well as established relationships and joint ventures with local firms—to complete projects that meet world-class standards.

Our solutions and expertise include power, oil & gas, chemical, water, wastewater, industrial processes and manufacturing, transportation, communications and information solutions, environmental services, and infrastructure development.
